

COVID-19 Treatment Recommendations for Outpatients

*Rebound symptoms have occurred with Paxlovid use. Do not repeat Paxlovid or prolong course.

**Molnupiravir has been related to teratogenicity in both females and males of child bearing age, use cautiously

COVID-19 Treatment Recommendations for Outpatients

Appendix A: Risk Factors for Progressing to Severe COVID-19 and/or Hospitalization:

*Not listed in order of degree of risk conferred

- Body mass index (BMI) ≥ 25 (age 12-17 yo BMI $\geq 85^{\text{th}}$ percentile)
- Pregnancy
- Chronic kidney disease
- Diabetes
- Immunosuppressive disease
- Currently receiving immunosuppressive treatment
- ≥ 65 years of age
- Cardiovascular disease (including congenital heart disease)
- Hypertension
- Chronic obstructive pulmonary disease/other chronic respiratory disease (including asthma, interstitial lung disease, cystic fibrosis and pulmonary hypertension)
- Sickle cell disease
- Neurodevelopmental disorders, for example, cerebral palsy or Down Syndrome, OR
- A medical-related technological dependence, for example, tracheostomy, gastrostomy, or positive pressure ventilation (not related to COVID-19)
- Other risk factors for severe COVID as identified by CDC (<https://www.cdc.gov/coronavirus/2019-ncov/hcp/clinical-care/underlyingconditions.html>)
- Or most recent criteria in FDAs most recent EUA update

COVID-19 Treatment Recommendations for Outpatients

Appendix B: Significant Drug Interactions with Paxlovid^a

Paxlovid Co-administration CONTRAINDICATED:		Use CAUTION when prescribing Paxlovid. Withhold medication or reduce dose if clinically appropriate and monitor closely. If withholding medication is not clinically appropriate, use alternative COVID-19 therapy	
<ul style="list-style-type: none"> Alfuzosin Amiodarone Apalutamide Bosentan Carbamazepine Cisapride Clopidogrel Clozapine Colchicine in patients with renal and/or hepatic impairment Disopyramide Dofetilide Dronedarone Eplerenone Ergot derivatives Flecainide Flibanserin Glecaprevir/pibrentasvir Ivabradine Lovastatin 	<ul style="list-style-type: none"> Lumateperone Lurasidone Mexiletine Phenobarbital Phenytoin Pimozide Piroxicam Propafenone Quinidine Ranolazine Rifampin Rifapentine Rivaroxaban Sildenafil for pulmonary hypertension Simvastatin St. John's Wort Tadalafil for pulmonary hypertension Ticagrelor Vorapaxar 	<ul style="list-style-type: none"> Alprazolam Amlodipine Atorvastatin Avanafil Bupropion Clonazepam Codeine Corticosteroids, systemic Cyclosporine^b Diazepam Digoxin Diltiazem Everolimus^b Ethinyl estradiol Fentanyl Hydrocodone Lomitapide Meperidine (pethidine) Methadone Midazolam (oral) Nicardipine 	<ul style="list-style-type: none"> Nifedipine Oxycodone Propoxyphene Quetiapine Rosuvastatin Salmeterol Sildenafil for erectile dysfunction Silodosin Sirolimus^b Suvorexant Tacrolimus^b Tadalafil for erectile dysfunction Tamsulosin Tramadol Trazodone Triazolam Vardenafil Warfarin

^a: Please refer to Paxlovid® [Package Insert](#) or University of Liverpool website (<https://www.covid-19-druginteractions.org/>) for a complete list of drug interactions.

^b: Requires expert recommendations prior to adjusting medication
